ROMAN SYLMAN

Frontend Engineer

Ukraine | Remote | sylmanroman@gmail.com

SUMMARY

Frontend Engineer with 3 years of commercial experience working on a complex fleet telematics SPA. I build and maintain real-time interfaces, interactive maps, and data-heavy features using Vue 3 and TypeScript. My work includes frontend architecture, performance optimization, large GPS datasets, WebSocket-based updates, code reviews, mentoring, and taking features from implementation to production.

EXPERIENCE

Frontend Engineer — Antenor | 2023 - Present

Fleet telematics platform for real-time vehicle monitoring, GPS tracking and analytics.

- Own complex frontend features from implementation through production.
- Build real-time monitoring interfaces with REST APIs and WebSockets.
- Develop interactive map features with OpenLayers and deck.gl, including large GPS datasets.
- Implemented track-history visualization for large GPS datasets.
- Built geozone tools for polygons, lines, circles and point-based areas.
- Led frontend architecture and UI decisions during a full product redesign.
- Profile and optimize SPA performance; investigate production issues with monitoring tools.
- Review pull requests, mentor a junior frontend developer, and support frontend engineering decisions.
- Maintain CI/CD flows across development, staging and production environments.

Stack: Vue 3, TypeScript, Pinia, Vue Router, Vite, Tailwind CSS, OpenLayers, deck.gl, WebSockets, REST API, Vitest, GitHub Actions, Sentry

SKILLS

Frontend	Vue 3, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Architecture	SPA architecture, state management, component design, API integration
Realtime & Data	REST, WebSockets, large-dataset visualization
Maps	OpenLayers, deck.gl
Engineering	Performance optimization, code review, testing, CI/CD, monitoring

EDUCATION & LANGUAGES

Master's Degree in Mechanical Engineering
(Applied Mechanics)
2020 - 2023

Languages
Ukrainian - Native
English - B1
